

Gaurav Rawat

Phone | Email | LinkedIn | GitHub | Portfolio | LeetCode

Summary

AI-focused software developer building **LLM-powered features, agentic AI systems, tool-calling workflows, and document-intelligence automation**. Shipped AI pipelines processing **3,000–5,000 emails/day**, agent orchestration with **deterministic evaluation and rollback**, persistent memory for AI agents, and a live AI-powered e-commerce platform serving **thousands of monthly visitors**. Strong in **Python, FastAPI, Node.js, PostgreSQL, AWS, Docker, prompt engineering, and AI workflow automation**.

Experience

WTI Cabs

July 2026 – September 2026

AI Engineer Intern

New Delhi, India

- Built an **AI-powered reservation automation pipeline** processing **3,000–5,000 emails/day**, extracting booking requirements and auto-creating reservations in an existing **.NET** backend.
- Designed a **five-stage pipeline** — ingestion → AI extraction → validation → corporate-rule evaluation → execution — with configurable rules and structured outputs.
- Persisted email, reservation, decision, and feedback data in **PostgreSQL**; containerized with **Docker** and deployed on **AWS** for production-scale processing.

Projects

Shinra — AI E-commerce & Content Automation

Live

Next.js, NestJS, Node.js, MongoDB, TypeORM, AWS

Jan 2026 – Present

- Built and operate a **live production e-commerce platform** serving **thousands of monthly visitors**, with AI-driven product and content automation.
- Automated weekly market research, **SEO-rich product content**, dynamic product generation, and AI-assisted poster mockup generation.
- Developed **REST APIs** and optimized queries for **10,000+ product records**; implemented automated **CI/CD deployment** and production infrastructure.

WTI Cabs — AI Reservation Automation

Jul 2026 – Sep 2026

Python, FastAPI, PostgreSQL, Docker, AWS, .NET Integration

Internship Project

- Built an **AI-powered reservation automation pipeline** processing **3,000–5,000 emails/day**, extracting booking requirements and auto-creating reservations in an existing **.NET** backend.
- Designed a **five-stage pipeline** — ingestion → AI extraction → validation → corporate-rule evaluation → execution — with configurable org-specific rules and structured outputs.
- Persisted email, reservation, decision, and feedback data in **PostgreSQL**; containerized with **Docker** and deployed on **AWS** for production-scale processing.

Apex AI — Agentic AI Coding Orchestration

24–26 Jul 2026

Python, FastAPI, LLMs, React Flow, Docker

GitHub

- Built a bounded **Criteria → Planning → Execution → Validation** agent workflow for autonomous coding tasks, with state management, retries, human approval gates, and guardrails.
- Implemented **deterministic evaluation** using test exit codes instead of LLM judgment, plus rollback and post-rollback verification.
- Built **FastAPI REST APIs** and background execution with workflow visualization; added **49 automated tests** covering orchestration and APIs.

Education

Guru Gobind Singh Indraprastha University (GGSIPU)

New Delhi, India

B.Tech. — Industrial IoT (IIoT) | CGPA: 8.2/10

Sept 2023 – July 2027

Coursework: Data Structures & Algorithms, DBMS, Cloud Computing, IoT Systems

Technical Skills

AI/LLMs: Prompt Engineering, Agentic AI, Agent Orchestration, Tool/Function Calling, Memory & Context Management, Structured Extraction, Summarization, Guardrails, LLM Evaluation, AI Automation

Backend: Python, FastAPI, Node.js, Express.js, NestJS, REST APIs, Authentication, Pagination, Rate Limiting

Databases: PostgreSQL, MongoDB, MySQL, SQLite, Qdrant, Neo4j, FalkorDB, TypeORM

Cloud/DevOps: AWS (EC2, S3, Lambda), Docker, OCI, CI/CD, GitHub Actions

Frameworks/Tools: React, Next.js, React Flow, MCP, RAG, n8n, Amazon Bedrock, Async Workflows, Git, Postman

Concepts: System Design, Event-Driven Architecture, Testing, Observability, Error Handling, Retries, Scaling

Achievements & Certifications

- Solved **597+** problems on LeetCode – **170 Easy / 319 Medium / 108 Hard** | Rank **145,641** globally | **11** badges | gauravrawatop
- Deutsche Telekom & Cursor Hackathon:** Built Apex AI, an agentic AI coding orchestration platform with planning, execution, validation, rollback, and human approval.
- Snap AR Hackathon Winner — India's First Snapchat AR Hackathon (2025):** built an AR lens using face tracking, computer vision, and real-time 3D rendering.
- Hugging Face Agents Course — Fundamentals of Agents (2026)**
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate (2025)**
- JavaScript Algorithms and Data Structures — freeCodeCamp (2023)**
